POLAR BEARS

Polar bears live in the Arctic. It is a land of ice and snow. Polar bears have a layer of fat. It is called blubber. Blubber helps keep them warm. They also have thick fur. The fur looks white, but the hairs are actually clear!

Polar bears have a good sense of smell. Some people call polar bears "noses with legs"! They use their sense of smell to hunt for seals. Seals are their favorite food.

Polar bears are tiny when they are born. Their eyes are closed. They have short, fine fur. Polar bear mothers feed their babies and keep them warm.

Polar bears are sometimes called "noses with legs."

1. Thick fat called _____ keeps polar bears warm.
 - fur
 - blubber
 - ice
 - food
2. What do polar bears like to eat best?
 - fish
 - seals
 - penguins
 - snow cones
3. What nickname do people call polar bears?
 - "noses with legs"
 - "abominable snowmen"
 - "seal-eaters"
 - "blubber bears"
4. What do polar bear mothers do for their new babies?
 - teach them to swim
 - teach them to hunt for food
 - love them
 - keep them warm and feed them

5. What do polar bears look like when they are born?

Answers

POLAR BEARS

1. Thick fat called _____ keeps polar bears warm.
 - fur
 - blubber
 - ice
 - food
2. What do polar bears like to eat best?
 - fish
 - seals
 - penguins
 - snow cones
3. What nickname do people call polar bears?
 - "noses with legs"
 - "abominable snowmen"
 - "seal-eaters"
 - "blubber bears"
4. What do polar bear mothers do for their new babies?
 - teach them to swim
 - teach them to hunt for food
 - love them
 - keep them warm and feed them

5. What do polar bears look like when they are born?

They are tiny. Their eyes are closed, and they have short, fine fur.

Punctuation and Spelling

Edit the news story below. Cross out misspelled words, capitalizing mistakes and punctuation mistakes. Write the corrected words and punctuation marks above the mistakes.

zombies protest library closures

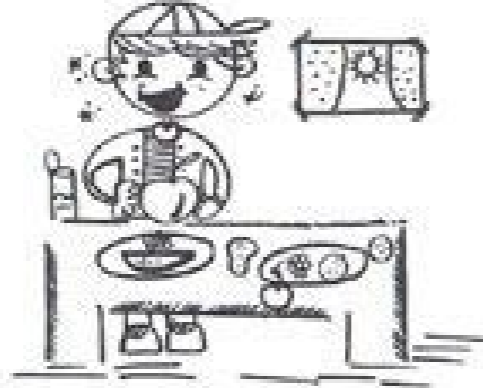

a small group of zombies marched down broadway ave in oakhurst California on friday to protest the closure of branch librarys across town. " Fewer librarys means fewer people reading , one outspoken zombie explained to reporters. " fewer people reeding means fewer big brains for us to eat." The zombies turned out too be a group of studints from lakeside middle school . They wer dressed as monstirs to have fun while increasing public awarness for there cause. a large crowd gathered on the side walk to watch the zombies. People claped and cheered in suport. Many of them joined the studints as they marchedd to city hall. the mayer of oakhurst came out to talk too the protesters. She agreed to meet with the studints on monday mourning. " Public librarys are important, she tolled the them. If we all work togethr maybe we can find a way to keep our librarys from clozing "

Name: _____ Date: _____

James and his Invisible

I have an invisible friend named Julian. When we're playing in my room and mom or dad comes in, they cannot see him.

- Who are you talking to? - Asked mom.
- With my friend Julian, I replied.
- And here is Julian? Mom asks again.
- Here playing with me.

My mom smiles and leaves my room. Julian and I also laughed because she could not see him and we keep playing.

Answer each question with a complete sentence.

1. What is the name of Santiago's invisible friend?

2. Why James says that his friend is invisible?

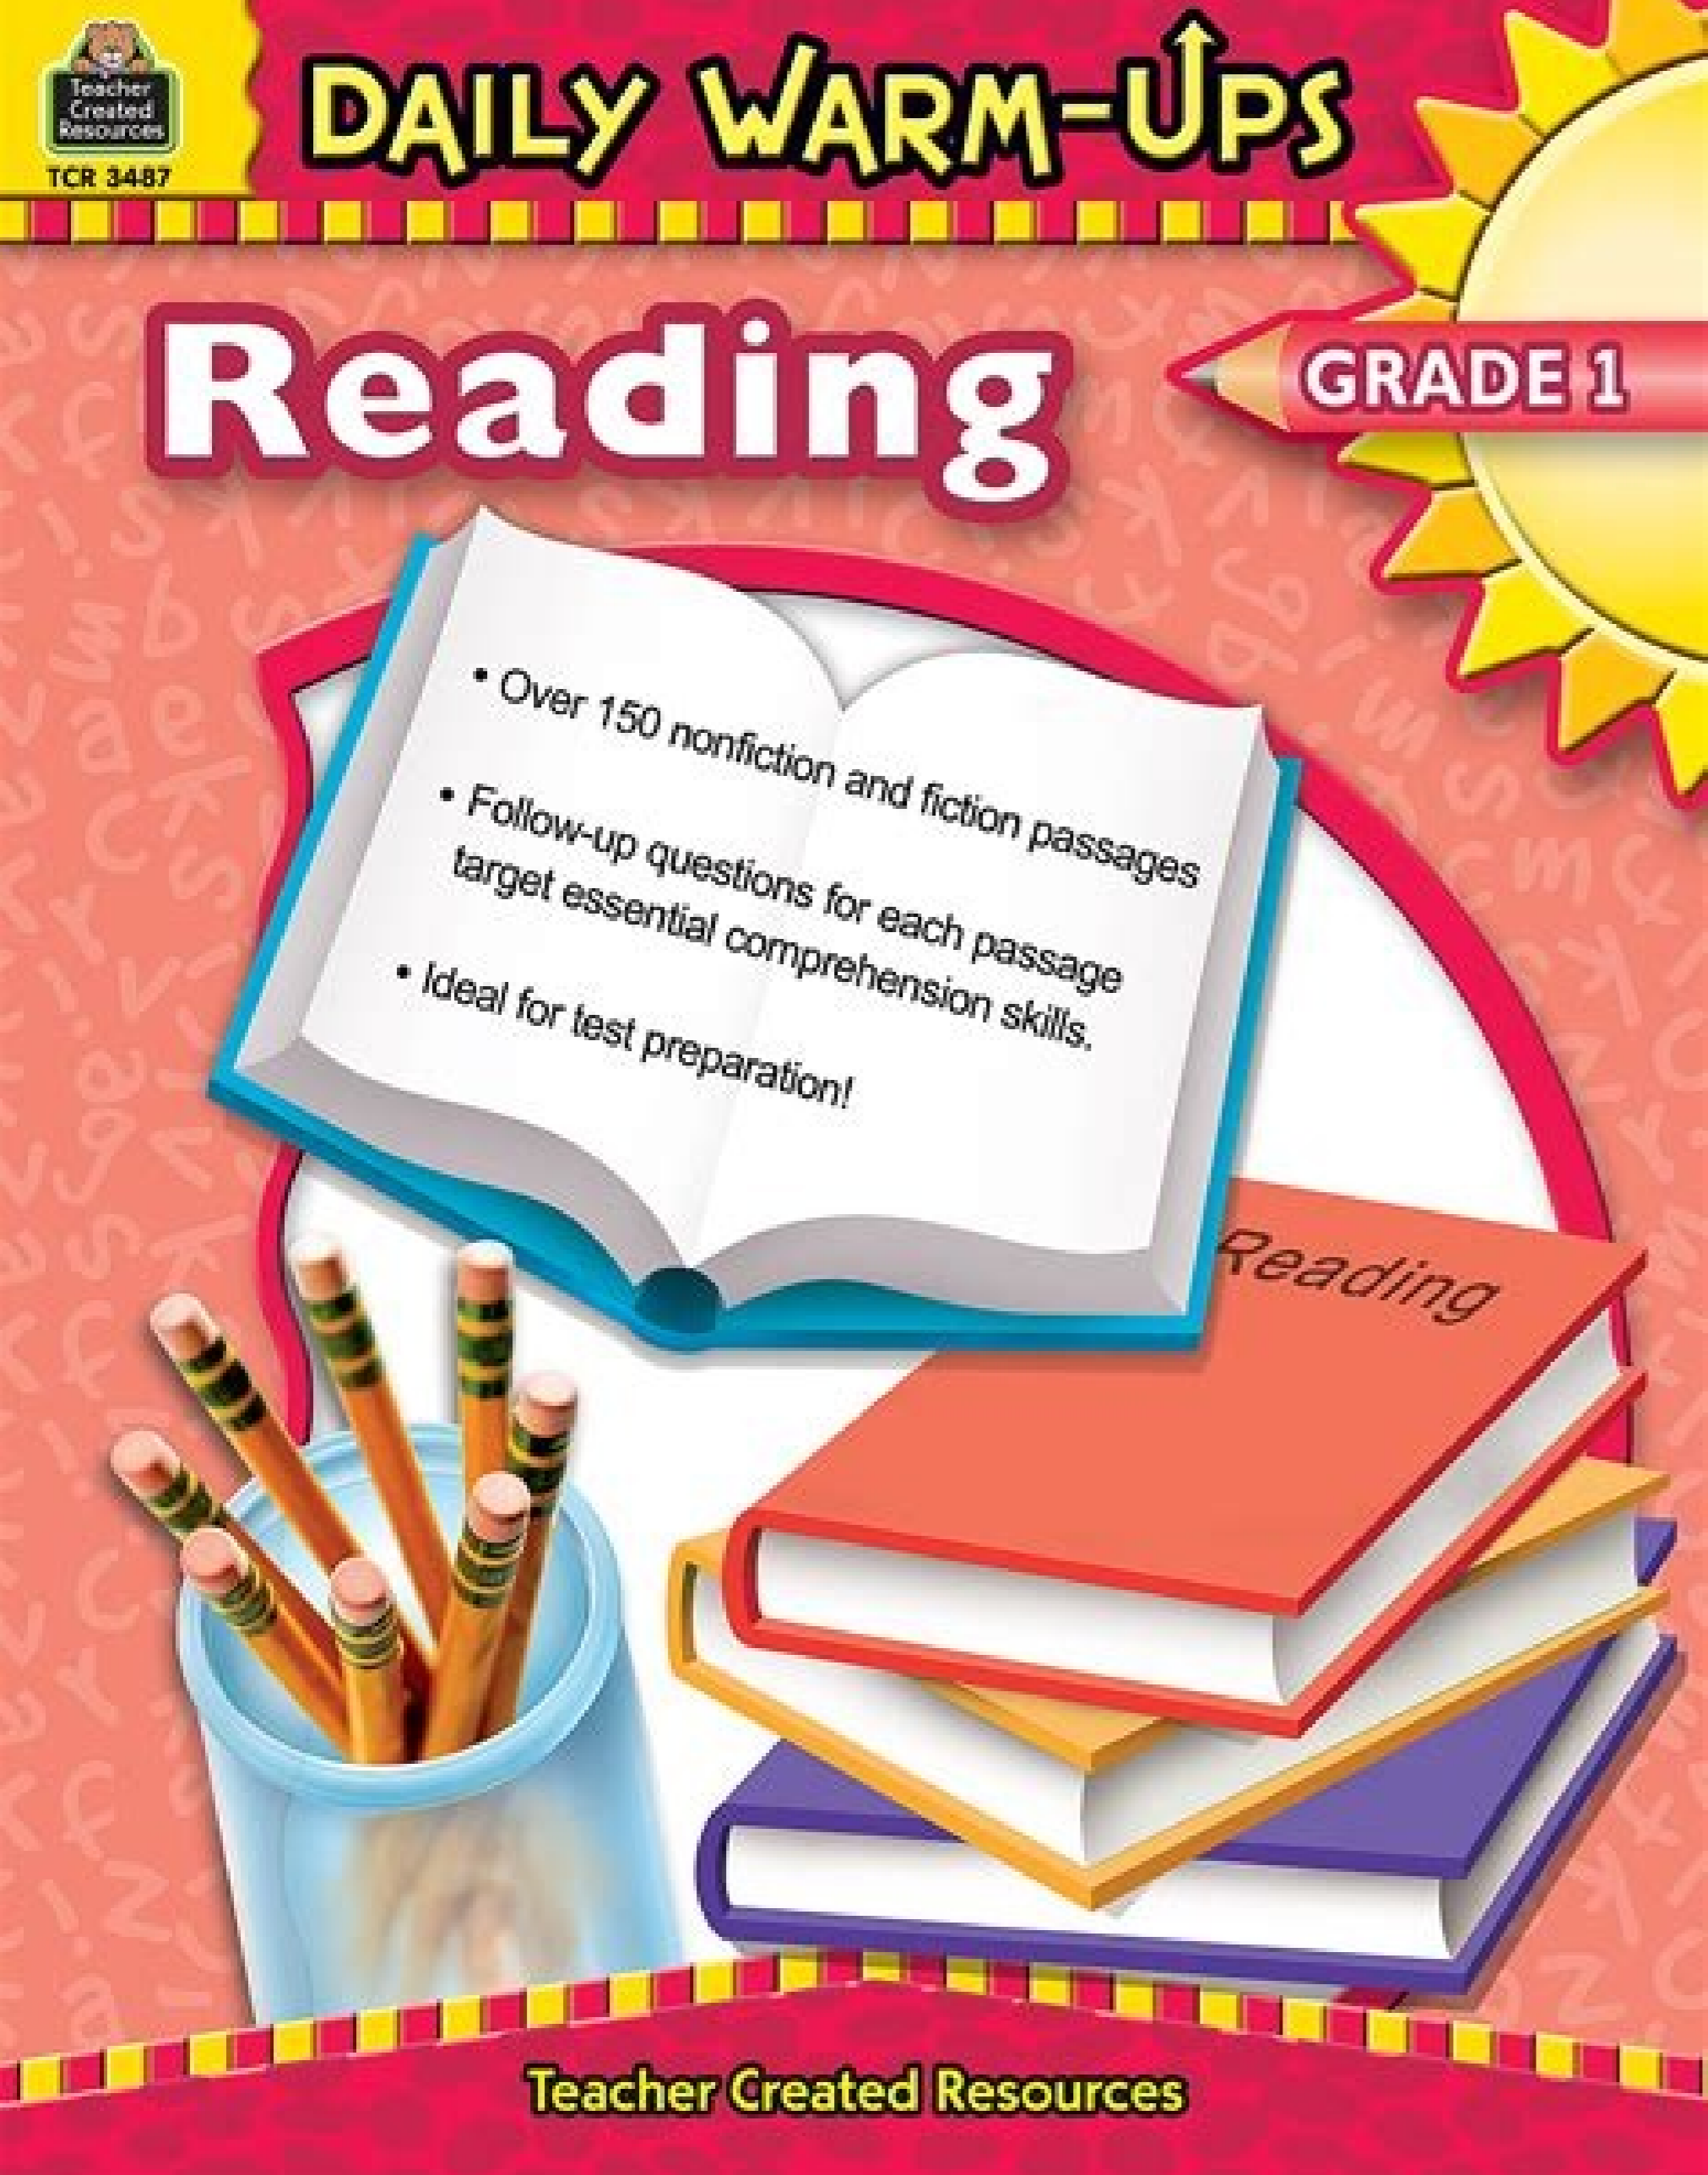

3. What question does the mother ask Santiago?

4. Do Dad and mom can see Santiago's friend?

5. When James says he is playing with his friend, what does mom his do?

6. What do James and his friend do when mom leaves the room?

7. Would you like to have an invisible friend? Why?

How obsessed we all became with online privacy

It began with radical "cyberpunks" who wanted to destroy the state. Now it's a red-button **issue** for every Facebook user. How did the notion of internet **privacy** give us so much attraction, and where will it take us next?

In the last couple of weeks, a handful of events have demonstrated how much that has all changed. Earlier this month the US Congress passed the "Freedom Act": 19 pieces of laws that will limit the amount of **data** collected on US citizens by the National Security Agency, something many privacy advocates thought impossible. Last week, David Anderson published an independent review of the UK government's investigatory powers and made over 100 recommendations about how to make **surveillance** simpler, clearer, and with more oversight. Perhaps even more surprising, although barely reported, Facebook decided to allow users to send **encrypted** messages on their messenger service.

This is all driven by growing public concern of course. According to the 2014 Deloitte Data Nation survey, 24% of people in the UK do not trust any type of organization with their personal information. Recent research by my think-tank Demos found half of young people said they were either extremely or very concerned by "online privacy" - more than environmental issues, immigration, tax avoidance, or the EU. There are more people using tools and techniques to cover their digital **tracks**, especially since Edward Snowden **blew his whistle**.

Internet privacy has become a major political and social preoccupation. But very few people know much about the origins of the idea. The hope that modern digital cryptographic software could change society goes back to the 1950s Californian "cyberpunks" (a mash up of the word cypher with cyber-punk). All were radical libertarians and early adopters of computer technology, sharing an interest in the effects it would have on politics and society. They all believed that the great political issue of the day was whether governments of the world could use the internet to **stagnate** individual freedom and privacy through digital surveillance, or whether autonomous individuals would undermine and even destroy the state through the subversive tool digital computing also provided.

But it's really only the last five years or so that it's moved from periphery to centre. Party it's Snowden. Party it's the relentless work of activists and journalists, but mostly it's the amount of time we now spend online. These days we share **enormous** amounts of digital information about ourselves: our bank details, our love life, our holiday snaps, our whole lives are online. And it's no longer just governments **gawking** at all - it's private companies, too. Think for a moment: do you ever wonder why it is that we get all these amazing internet services - Facebook, Twitter, YouTube, Gmail - for free? I rarely think about it, either, because I'm used to it all just being there, and always working. But it costs an awful lot of money to run these **platforms**: the server space, the highly skilled engineers, the legal teams. We are paying all right, just not in cash. We pay with our data and our privacy.

© James Barrett (creator of Social Media) for the Analysis of Social Media - 14 Jun 2015 - (edited and adapted) accessed 25 June 2015.

1. Match the underlined words in the text with their synonyms.

a) excessive
b) structures
c) paths
d) topics
e) information
f) vigilance
g) written in a special code
h) taking it themselves
i) security
j) happened

2. Complete the sentence with a suitable word from the previous exercise.

a) Technology has put people's in danger.
b) If you had your message, they wouldn't have been able to decipher it.
c) Governments shouldn't people's freedom.
d) Nowadays, everywhere we go, we are under electronic and told everybody about our project.

3. Read the text and say if these statements are TRUE or FALSE.

a) Facebook users have strong feelings about online privacy.
b) US Congress has just passed laws to let NSA spy on people.
c) Facebook changed people's security policy.
d) A quarter of the UK's population put their personal information online without any problem.
e) According to James Barrett, 50% of British young people are more worried about the environment than anything else.
f) The concept of 'Internet privacy' was created by the cyberpunks.
g) The cyberpunks wanted to see what political and social consequences computer technology would have.
h) There is only a tiny quantity of people's personal information on the net.
i) Snowden, activists and journalists are the only ones responsible for this discussion about online privacy.
j) Facebook, Twitter and many others provide us with free services because the governments pay them.
k) It's very expensive to keep platforms like Facebook and Twitter functioning.
